

Vision Statement

The Community College of Baltimore County (CCBC) has a comprehensive International Education program, which promotes global citizenship among members of the college and the community at large. CCBC prepares the learner to live and work in an interconnected and diverse world.

Mission Statement

The primary role of the International Education program at CCBC is to facilitate learning and cross-cultural exchanges for an increasingly diverse population. We develop an atmosphere that fosters growth, enhances global perspectives, and improves student learning at CCBC and with our many partners.

Coupled with this goal are multiple objectives that focus on providing a range of programs and services for international students studying on CCBC campuses and CCBC students who travel abroad. The International Education program supports CCBC's goal to embrace diversity through the internationalization of the curriculum to prepare students for careers and life in a global community. CCBC advocates for students and helps international students adjust to their new learning community. In addition, CCBC is dedicated to providing unbiased, accurate and timely service to students, faculty, staff and the community about international government regulations, educational policies, and opportunities.

The result is an International Education program that includes international professional development opportunities and integration of global perspectives into the curriculum. CCBC's team of International Education includes International Admissions, International Student Services, English for Speakers of Other Languages, Study Abroad, Travel Abroad and Multicultural Affairs.
