UNDERSTANDING THE HUMAN CONDITION
Studies in the humanities explore our unique connections
SEE WHAT YOU CAN BE!

Ready to get started at CCBC? We can help you take the next steps.

ADMISSIONS

Attend one of our virtual Discover CCBC virtual information sessions to meet with admissions counselors, explore our academic programs, and get answers to your questions about financial aid, student services and much more.

Attend CCBC while in high school

This session is intended for high school and home-school students who wish to jump start their college careers. We’ll introduce you to our Early College Access Programs (ECAP) and other unique opportunities. Parents are encouraged to join the discussion.

Get started at CCBC

Whether you recently graduated from high school or are returning to college, this information session will cover everything you need to know about the admissions process at CCBC.

All sessions begin at 5 p.m. Visit ccbcmd.edu/infosessions to view dates and register for an event.

CONTINUING EDUCATION

OPEN HOUSE/orIENTATION

Adult Basic Education and GED Preparation Registration

Registration sessions are held at each main campus by appointment only. Schedule an appointment for an assessment session at 443-840-3456 or gednedp@ccbc.edu

CNC Machine Tool Training

Mandatory Orientation

Wednesday, August 25
CCBC Catonsville, HTEC Building, Room 006
9 a.m.-12 p.m.

Summertime is fun time with KIDS@CCBC

It’s time for kids to have fun again.

CCBC is ready to make that happen with a whole array of classes on campus and online this summer, filled with fun and learning for students ages 7-17. Whether you want academics, STEM, cooking or something more active, we have a class for that!

Our instructors are experienced professionals who enjoy helping children learn. Whether you’re looking for lessons from home or you’re ready to explore classroom options, there are many choices to let you experience an active summer. All on-campus classes adhere to COVID safety protocols, ensuring smaller teacher-to-student ratios.

An on-campus class offers a chance to learn how to grow the ingredients to create yummy pasta and pizza recipes. Maybe it’s time to get moving with tennis, golf and self-defense classes on campus, or ballet and dance classes through Zoom. We’re here to help kids shake off the inactivity of the past year and have some fun.

There is still time to register. On-campus classes begin July 12 and run through August 13 at CCBC Essex and CCBC Owings Mills (no all-day camps or after-school care offered). Zoom classes are also available during this time. Visit ccbcmd.edu/KidsAtCCBC to enroll.

For more information, call 443-840-4700 or chat with us at ccbcmd.edu/ConEd.

Middle States accreditation process underway

Every eight years, CCBC’s institutional accreditation with the Middle States Commission on Higher Education (msche.org) must be reaffirmed. This accreditation status is essential to CCBC’s ability to offer student financial aid and provide a wide range of student resources and services. Our institutional accreditation also enhances the ability of CCBC students to seamlessly transfer to other colleges and universities.

More than 150 members of the college community—representing the CCBC Board of Trustees, faculty, staff and students—are currently participating in the two-year, in-depth self-study process that forms the foundation for accreditation. During this self-study, CCBC’s accreditation team examines not only the specific requirements of the MSCHE Standards of Accreditation and Requirements of Affiliation, but also the activities that advance CCBC’s mission and strategic priorities.

A team of external peer reviewers will participate in an on-site visit to CCBC in 2022. The goal is reaffirmation of institutional accreditation by the MSCHE Board of Commissioners.

RETHINK. REENVISION. REAFFIRM.
CCBC Middle States Self-Study 2022
Health care career training is just a click away

Since the advent of the coronavirus pandemic more than a year ago, the demand for health care workers has climbed sharply. And so has the need for training programs that prepare people to enter this highly skilled and in-demand workforce.

But educational programs also must fit the unique learning and everyday life requirements of students. During these unprecedented times, it’s reassuring to know that CCBC Online conveniently offers a number of degree, certificate and workforce training programs entirely online—enabling students to become job-ready anywhere, anytime.

As health care systems are quickly evolving from paper-based to electronic recordkeeping, the need for workers with analytical and data management skills is significant. The HIIT degree program at CCBC prepares students for challenging careers as compliance managers, quality assurance officers, health data analysts, health record technicians and more.

Students who are interested in Medical Coding careers can complete a credit certificate in this specialty in as little as 18 months and be qualified for employment in hospitals, clinics, physicians’ offices, nursing facilities, insurance companies and other health care settings.

CCBC’s degree program in Human Services Counseling offers three main tracks: Alcohol and Drug Counseling, Elder Care, and At-Risk Youth Care.

In keeping with CCBC’s commitment to the health and safety of the college community in pandemic times, this program utilizes interactive video to practice counseling skills, which also aligns with the current movement toward telehealth. And with stackable credentials, new students can begin working as alcohol and drug counselor trainees after completion of their first 15 credits.

For more information on these and other CCBC online career training options, visit ccbcmd.edu/online.
“Online classes require discipline and dedication, but I love the flexibility and independence.”

Sasha-Rae Mohead
Online Health Informatics and Information Technology program
Gear up for a career behind the wheel

Look around your home, office, school or favorite store. Chances are, everything you see has been transported—at some point—by truck. These vehicles are vital to local, regional and national economies, and require skilled and specially trained operators.

To meet the increasing need for qualified truck drivers, CCBC has re-launched its CDL-A training program at the CCBC Transportation Training Center at Tradepoint America, on the east side of Baltimore County. This exciting new facility has quickly become one of the most significant global logistics hubs in the country.

CCBC’s eight-week, 280-hour trucking program is designed to provide a pool of skilled drivers for transportation companies in the Baltimore region and beyond. The program emphasizes safety, using state-of-the-industry equipment and a small faculty/student ratio, and always keeps COVID safety protocols in place.

The all-inclusive program includes the cost of the U.S. Department of Transportation drug screen, student physical exam, and learner’s permit fee. Students receive top-notch skills training in addition to emphasis on driver courtesy, vehicle inspections, trip planning and logistics, and logging protocols to meet DOT compliance as well as HAZMAT and accident reporting procedures. A Class A license qualifies a driver to operate many different types of commercial trucks and tractor-trailers.

Applicants must be 18 years old, able to pass a DOT drug screen and physical, hold a valid Maryland Driver’s License (Class C), and maintain zero points for drug/alcohol violations. Successful completers of the CDL training will be prepared to take the Commercial Driver’s License skills exam and be on their way to a promising career full of opportunity.

Ready to hit the road? Visit ccbcmd.edu/CDL for information on how you can prepare for a career in transportation.
Passionate about helping people, CCBC student Rama Thaher-Sawalhi returned to college—17 years after graduating from high school—to study Human Services Counseling.

She’s confident that her current humanities-based studies will provide her with the skills necessary to excel in her future career as a counselor.

“I enjoy learning how to give people a different perspective that will help give them new life—a more meaningful one,” said Rama.

Rama is among the more than 100,000 students across the nation earning degrees within the humanities every year. Popular humanities majors include English, world languages and history, as well as fields of study like philosophy, economics, sociology and many others.

The humanities encompass the study of human culture, or how people understand and express the human experience. With courses heavy in reading, writing, speaking and critical thinking, the humanities help people become better problem-solvers and decision-makers.

Monica Walker, CCBC’s principal investigator for Humanities for All, an initiative encouraging students to take humanities courses, says students with exposure to these subjects reap many benefits.

“The humanities teach important life skills and develop well-rounded individuals,” said Walker. “The ability to think critically, communicate effectively and show empathy for others are invaluable skills often sought by employers.”

A survey published by the American Academy of Arts and Sciences revealed that 95% of Americans agree that humanities should be an important part of every American’s education, and reported that 81% use at least one humanities skill in their job.

Studying the humanities is not all work and no play. Many students take humanities courses for pleasure or self-enrichment.

Rama plans to pursue her bachelor’s degree and become a school guidance counselor.
CCBC Continuing Education offers more than 20 different courses in the languages and other interesting humanities courses such as Tales of Greek Mythology, and Favorite Italian, French, German and Russian Operas.

Thu Schaeffer, lead instructor for Continuing Education’s World Languages, says students’ reasons for taking language courses are varied, but many just enjoy learning something new.

“Most students take our language courses for their own personal enrichment,” said Thu Schaeffer, lead instructor for Continuing Education’s World Languages courses.

“They want to keep their minds sharp and engaged, and to constantly maintain and improve their ability to communicate. Learning a foreign language broadens the students’ horizons and often opens doors to many opportunities in the world.”

Explore CCBC humanities-related course offerings at ccbcmd.edu/humanities-for-all (credit) and ccbcmd.edu/fun (Continuing Education).
Sustainability starts at home

We've only got one Earth. Like everything of importance, it needs to be cared for and respected if we want it to last. That's where the concept of sustainability comes in.

In a global sense, sustainability means responsibly using our planet’s resources in a way that preserves them for generations to come. It's a way of thinking that's crucial on international and national levels—but just as important for individuals, families and communities to embrace.

Here are a few simple things you and your neighbors can do to foster sustainable practices in your home and community.

**Ditch the disposables.** Choose reusable totes over single-use plastic bags, dishcloths instead of paper towels, refillable containers in place of bottled water or single-use beverage cups. Wrap gifts in reusable bags or colorful cloth instead of manufactured wrapping paper. In the kitchen, consider using glass containers instead of plastic wrap or zip-top bags for food storage.

**Look at labels.** When possible, choose “Fair Trade” certified goods when shopping for produce, chocolate, coffee, clothing, home goods and other products. This designation recognizes companies that have adopted sustainable production practices, quality-of-life working conditions, environmental best practices, and pay workers a fair wage.

**Green your clean.** Natural cleaners are not only good for the environment, they can benefit your budget too. Common household staples like white vinegar, baking soda, borax and essential oils can be used to create a variety of cleaning solutions. Be sure to research what products can be used together and what’s appropriate for the surfaces you want to clean.

**Watch the water.** On average, Americans use 80-100 gallons of water per day, and that’s just indoors. Scale back your water use by adopting some simple conservation habits: Turn off the faucet while you shave or brush your teeth. Run your dishwasher or washing machine with full loads only. Check faucets, pipes and toilets for leaks. Use a broom instead of a hose to clean sidewalks and driveways.

---

Sustainability on campus

CCBC is proud to actively promote sustainable initiatives on all of its campuses, educating and engaging the college community in environmentally sound practices. These include solar car port installations, green roofs on new buildings, energy-efficient lighting and water-saving fixtures, environmentally friendly cleaning products, single-stream recycling, and hybrid-electric fleet vehicles. [ccbcmd.edu/sustainability](http://ccbcmd.edu/sustainability)

The college’s Sustainable Horticulture degree program educates and trains students in the responsible management of land and water resources, ensuring minimal impact on the earth’s ecosystem. As landscape professionals, graduates can help homeowners, designers, and urban planners apply these sustainable practices to provide functional, aesthetic, and environmentally sound designs. CCBCMD.EDU/GETSTARTED
A native of Cameroon, Camilla came to the United States in 2019. Soon after her arrival, she enrolled in the online Cybersecurity program at CCBC—a perfect fit for the affordable and flexible degree program she was looking for.

“As a mother of two who is working a full-time job and an internship, I am able to study full time, manage my responsibilities at home and work, and still make top grades,” she explained. “And I like the way CCBC online courses maintain a classroom feel.”

CAMILLA TIMFE

ENROLLED IN
Online Cybersecurity associate degree program

NEXT STEP
After graduation from CCBC, Camilla plans to continue her studies and earn her bachelor’s and master’s degrees in Cybersecurity.

ONLINE CLASSES WORK FOR YOU:
