ADMISSIONS

Discover CCBC!
Attend one of our virtual information sessions to meet with admissions counselors, explore our academic programs and get answers to your questions about financial aid, student services and much more.

Get started at CCBC
Whether you recently graduated from high school or are returning to college, this information session will cover everything you need to know about the admissions process.
Visit ccbcmd.edu/infosessions to view dates and register.

Attend CCBC while in high school
This session is intended for high school and home-school students who wish to jump start their college careers. We’ll introduce you to our Early College Access Programs and other unique opportunities. Parties are encouraged to join the discussion. Visit ccbcmd.edu/earlycollege.

REGISTRATION IS NOW OPEN
Late-start summer and fall semester classes available.
July 17: Late-start summer 5-week session
Aug. 28: Full fall semester and 7-week session
Sept. 25: Late-start 10-week session
Oct. 18: Second 7-week session

Nurturing future nurses
Public/private partnership works to build up the bedside workforce

The healthcare industry continues to face hiring challenges due to high attrition caused by the COVID-19 pandemic. According to the Bureau of Labor Statistics, healthcare workers have quit at the highest rate in 20 years. For hospitals, the need is great, and nursing positions are difficult to fill.

A new public/private partnership between CCBC, University of Maryland St. Joseph Medical Center (UM SJMC) and Baltimore County is addressing this workforce need by giving people easier access to a nursing career and to fill bedside vacancies. The partnership, called the Public Health Pathways Program, specifically connects residents in historically underserved communities with high-demand nursing positions.

The program provides 30 scholarships that fully cover tuition and fees for CCBC’s Certified Nursing Assistant program. Once students graduate, they are offered employment with full benefits at UM SJMC where they can continue their education and work toward becoming a licensed practical nurse.

“High turnover at the bedside has left the hospital constantly recruiting and rebuilding its staff,” said Nicole Beeson, MBA, MSN, RN, senior vice president of Patient Care Services at UM SJMC. “Quality patient care starts with having adequate staffing at the bedside. That’s why this partnership is so important. It offers access to a solid career and helps the hospital fill much-needed certified nursing assistant positions, with potential for continued growth.”

Beeson, a CCBC alum, knows the benefits a healthcare career can provide. She said her start in CCBC’s Nursing program was life-changing.

“When I enrolled in CCBC’s Nursing program, it was during a difficult time in my life,” Beeson explained. “I was unexpectedly faced with raising three children on my own. I needed to figure out a plan for supporting my family, and I knew I wanted a career to help people. Education was my path out of my current circumstance. CCBC’s Nursing program gave me the flexibility I needed to care for my kids and the opportunity to reclaim the future for myself and my children.”

Students selected for the Public Health Pathways Program also receive a $1,000 workforce monthly stipend to help with things like transportation, childcare and housing needs, further breaking down barriers to a nursing career.

“Our hope is to create a bit of community around this group of students and watch them rise together,” said Beeson. “That’s what happened to me at CCBC.”

Extensive wraparound support for students in the program includes mentors, coaching and customized blueprints for success.

“From day one they’ll learn about us, learn how we do things, and we will also learn from them,” said Beeson. “We want them to know there’s a place for them here, whether they’re a CNA, LPN or RN. We’re all here to serve the same mission.”

Lights. Camera. Action!

“The College Tour” series features CCBC students

CCBC has made its debut to a national audience on “The College Tour” TV series. In an entire episode dedicated to the college, 10 current and former students tell viewers how CCBC’s affordability, flexibility, quality academics and unique job training opportunities helped them thrive and succeed.

Here is a snapshot of their stories. Watch the full episode on Amazon Prime and at TheCollegeTour.com.

STORIES.CCBCMD.EDU/ COLLEGE- TOUR

Learn about campus life and activities at CCBC: ccbcmd.edu/campus-life-and-activities
Iyona Anderson
Fast-tracking a career through Continuing Education
As a non-credit student, Anderson earned her GED and a pharmacy technician certificate in six months to fast-track a career. The Continuing Education program helped her overcome hard times, fill in the gaps in her education and quickly acquire the job training she needed to get back on her feet.

Leah Howard
Jump-starting college through the Early College Access Programs
As a high school student, Howard took advantage of CCBC's Early College Access Programs, earning 30 college credits towards her associate degree by the time she graduated from high school. This Fine Arts major also runs her own fashion and photography businesses.

Anderson Jaggernauth
A committed alum
Jaggernauth used his time as a student at CCBC to find the right career path. He earned an associate degree in General Studies and now works in the information technology field, with plans to pursue his bachelor's degree in computer science or IT. He is also an active member of CCBC's Alumni Board.

Kalla Lavender
Standing out in student life
Lavender has enjoyed both academic and social support at CCBC. In addition to her coursework toward an associate degree in Cybersecurity, she actively participates in CCBC's student life culture, serving on the Student Government Association, participating in various clubs, working in the college's bookstore and making many friends along the way.

Asia Lee
An Honors Program achiever
As a member of CCBC's Honors Program, Lee is pursuing an academically rigorous courseload to earn an associate degree in Elementary Education. Generous financial aid and scholarships, including a Maryland Community College Promise Scholarship, are making her education very affordable.

Bernard “Buzi” Mkumbuzi
Getting career-ready through the Male Student Success Initiative
As Mkumbuzi explored his career options at CCBC, he found extra support and encouragement through CCBC’s Male Student Success Initiative, a program designed to improved graduation rates and ensure career readiness for male students of color. He recently earned his associate degree in American Sign Language and plans to transfer to a four-year university.

Philemon Phalwas
Earning an associate degree and a foundation for the future
Phalwas is pursuing an associate degree in Dental Hygiene at CCBC and building the solid foundation he needs to transfer to dental school and find work in a field currently in high demand. He has benefitted from engaged faculty who are experts in their field and comprehensive classes and clinics taught in state-of-the-art facilities.

Francesca Prado
Pursuing college online
CCBC's online degree options made Prado's dream to attend college both accessible and attainable. She is pursuing an associate degree in Psychology at CCBC and plans to work as a child life therapist one day, providing services to children facing life challenges, just as she did while growing up.

Nichelle Roane
A career changer with a winning business idea
Roane is a CCBC alumnus who returned to the college seeking help to change her career, and she found it through CCBC’s Center for Business Innovation (CBI). CBI helped her take a business idea and make it flourish into a successful enterprise that benefits the community and allows her to be her own boss.

Ryan Washington
Finding fulfillment in a workforce trade
For Washington, a former student and now current faculty member, CCBC helped turn his love of working on cars into a career. Through a combination of hands-on and classroom learning, Washington earned an Automotive Technician degree at CCBC and then transferred to a four-year university where he earned a bachelor's degree in Automotive Engineering Technology. Today he works full-time in CCBC’s automotive lab, passing his knowledge on to students.
When you think of community college, competitive sports teams may not come to mind, but that’s where CCBC is ahead of the game.

CCBC has a robust Athletics program featuring 21 teams across its three campuses: CCBC Catonsville, CCBC Dundalk and CCBC Essex.

“Oftentimes, junior or community colleges are overlooked by our local high school students and students in general,” said Melissa Miller, director of College Athletics at CCBC. “We are a Division II program, and we offer athletic scholarships. We provide opportunities for student athletes to continue their careers one or two years after high school. Some people don’t even know that’s an option.”

In the past year, both the Essex Knights men’s and women’s soccer teams made it to the national championships, and Essex men’s player Toga Katsuma was the first CCBC student athlete to be named the National Junior College Athletic Association (NJCAA) Division II National Player of the Year.

Also making it to the nationals was the CCBC Essex men’s cross country team and the CCBC Essex women’s basketball team, which had a record-setting 53-game winning streak from 2019 to 2022.

Freshman Keynaud Randolph of the CCBC Catonsville Cardinals men’s cross country team also participated in the national champions. And last spring, CCBC Catonsville baseball’s Angelo Ramirez was a Rawling’s Gold Glove winner and set a new school record for stolen bases.

According to Miller, the programs are so successful in part because of CCBC’s coaching staff, who are all part-time coaches who put in full-time effort.

“We have a phenomenal coaching staff, and I would put them up against the best in the country,” said Miller. “They can’t get enough credit for the service they provide in regard to student recruitment and investing in our student athletes’ overall growth. It’s invaluable.”
Toga Katsuma, a soccer player from Shiga, Honshu, Japan, came to the United States with an offer to join the CCBC Essex men's soccer team starting in the 2021 spring season.

“I think it was a great experience for me to be able to go from my first season to the national finals,” said Katsuma, who recently finished his third and final season with the team—each time making it to nationals.

Winning the NJCAA Division II National Player of the Year had always been one of his goals.

“This is a very prestigious award, and I think it will help me grow both as a person and as a soccer player,” he said.

Joe Fiedler, head coach for CCBC Essex men’s soccer, could not think of a player more deserving.

“Toga puts his heart and soul into soccer,” said Fiedler, who has coached at CCBC since 2012. “He is extremely technical, and his work ethic is unbelievable. But the best part about Toga is that he is a really good, respectful young man off the field.”

Katsuma, a General Studies major at CCBC, is now weighing his future. He is considering four-year universities and wants to eventually play professional soccer in the U.S.

“CCBC has been very helpful in my career as an athlete,” said Katsuma. “Coach Fiedler told us the most important thing is to always respect our opponent, both off the pitch and on the pitch. I was very grateful to learn these things from my coach on a daily basis. I had the best experience with CCBC. These memories will last a lifetime.”
It’s never too late to get your high school diploma at CCBC

Sometimes life doesn’t go as planned, and that’s where CCBC can help. If you’re an adult who has not graduated from high school, CCBC offers two different ways to earn your Maryland State High School Diploma.

The first option allows students to take preparation classes in areas such as math, reading and language arts, social studies and science for the GED exam, which is offered at CCBC Testing Centers. Alternatively, students may participate in the National External Diploma Program (NEDP) to complete an assessment of prior learning toward earning a high school diploma. NEDP is not test-based, rather it is a self-paced, online program in which students complete modules to demonstrate their competency in both academic and functional life skills.

“Every student has their own path,” said Kimberly Sansone, director, Literacy Programs and Workforce Solutions at CCBC. “The reasons people come back to get their high school diploma run the spectrum.”

Some people have children or grandchildren now, and they can’t help them with their homework. Some can’t advance in their current job or want to change careers. Some of the older students who are retired come out of a sense of pride or to prove something to themselves. Everyone is accepted at their own education level, and it is not possible to fail the entry assessment.

According to Sansone, CCBC helps 800-1,000 students per year earn their high school diploma. There are multiple entry points in fall, spring and summer, and the average age of students in the programs is mid-30s.

“It’s never too late,” said Sansone.

After they earn their high school diploma, students have many opportunities to continue at CCBC in workforce training or a credit program. The High School Diploma program also offers students support to help them with next steps.

“We know that our students have a lot going on in their lives, and they may need assistance with housing, childcare, food insecurities and transportation,” said Sansone. “We can connect them with community resources that can help them stay the course and meet their goals.”

To learn more, visit cbcmed.edu/GED.

Iyona Anderson

In just six short months, Iyona Anderson earned her GED and her Pharmacy Technician certificate from CCBC to fast track a new career. CCBC helped her overcome hard times, fill in the gaps in her education and quickly acquire the job training she needed to get back on her feet.

"After receiving my GED at the age of 25, I now realize that anything is possible," said Anderson. "One of the greatest advantages of attending CCBC is that the academic advisors have helped me tremendously. They helped me get enrolled and pick the right classes for my degree without overwhelming myself."

Anderson is currently working toward her associate degree in Mortuary Science. After graduating from CCBC, she would like to become a licensed funeral director and one day own her own funeral home.

"Although this is a big goal, I have confidence that obtaining my associate degree at CCBC will be the best first step to take in achieving my ultimate goal," she said.

See more about Iyona’s story at stories.cbcmed.edu/college-tour.
Summertime in Maryland offers abundant opportunities to swim and explore natural water with family and friends. But a good time around water can quickly turn tragic if basic safety rules are not followed.

Swimming safety
First, when taking a swim, know your limitations. Don’t overwork yourself and keep in mind any medical conditions you may have. If you are unsure about your swimming ability, enroll in a swimming class. Any adult or child aged six months or older can take a swimming class.

When possible, swim with a lifeguard present and always follow any directions given.

“If you are in a body of water without a lifeguard, make sure to swim with someone else,” said Maddison Hilton, senior lifeguard at CCBC. “It doesn’t matter what your swimming abilities are; it is never safe to swim alone.”

Boating safety
If you are boating or in a natural body of water, try to understand river currents, water temperature and underwater hazards. Wear a Coast Guard-approved life jacket or check the depth of the water and locate the water’s bottom if you don’t have a life jacket.

“If you are unsure of the water’s depth, never dive headfirst,” Hilton said. “Diving headfirst in shallow water can cause a head injury, so you should dive feet first.”

Consider becoming a lifeguard yourself, in addition to learning CPR and first aid. Having a lifeguard in a group can ensure family and friends stay safe during outings. Otherwise, if someone is in danger in the water, throw them a floating device and call 911. If you try to rescue them yourself and fail, then you may have two people in danger and no one to call for help.

Become water wise at CCBC
CCBC offers a number of non-credit courses to help you swim and boat safer, including basic boating certification, lifeguard certification, S.C.U.B.A. diving certification, CPR/first aid training and swimming classes for elementary, intermediate and advanced levels.
