

Common Course Outline
MCOM 130
Electronic Media Programming
3 Semester Hours

Community College of Baltimore County

Description

Electronic Media Programming

Covers the fundamental programming strategies for conveying information, ideas and values to target audiences. Emphasizes roles of management, advertisers, regulatory agencies, program producers and media consumers; focuses on the development and distribution of television and radio program formats and series.

Prerequisites: ACLT 052 or ACLT 053

Overall Course Objectives

Upon successfully completing this course, students will be able to:

1. Analyze programming strategies for commercial and noncommercial television stations, broadcast and cable networks, and radio stations.
2. Evaluate how programming decisions are made and explain the factors influencing those decisions.
3. Explain program format appeals and structures along with the fundamental considerations that are essential to successful program development.
4. Comparatively evaluate current radio and television program content.
5. Design a television and a radio program that demonstrates an understanding of program format appeals and structural elements.
6. Design a radio station programming format.
7. Analyze current trends and applications of programming theory.
