

NURN 234

Nursing Concepts II

5 Credits: 2.6 credits lecture and 2.4 credits lab/clinical

Community College of Baltimore County Common Course Outline

Description

NURN 234 – Nursing Concepts II: Students examine the role of the nurse generalist in the provision of complex nursing care to clients, families, and communities. Emphasis is placed on the nursing concepts of advanced elimination, immunity, inflammation, perioperative, and community-based nursing care. Supervised simulation and clinical experiences are designed to enhance students' development of clinical reasoning and clinical judgment.

Pre-requisites: NURN 160 (with a grade of C or better)

Overall Course Objectives

Upon completion of this course, students will be able to:

1. use nursing judgment to create a patient-centered care plan for clients with alterations in elimination, immunity, and inflammation;
2. determine a nursing plan of care to prevent and manage complications related to alterations in elimination, immunity, and inflammation;
3. examine evidence-based practices related to alterations in elimination, immunity, and inflammation;
4. explain pharmacologic principles in the care of clients with alterations in elimination, immunity, and inflammation;
5. integrate safety into the nursing management of clients with alterations in elimination, immunity, and inflammation;
6. identify safe practices within community based and perioperative settings;
7. recommend health promotion activities for clients with alterations in elimination, immunity, and inflammation;
8. examine nursing roles in multiple community settings;
9. explain management of clients with communicable diseases;
10. examine nursing roles in preoperative, intraoperative, and postoperative areas;
11. differentiate nursing care in the preoperative, intraoperative, and postoperative areas;
12. display caring behaviors related to the care of clients in inpatient and outpatient settings; and
13. prioritize care of clients in all applicable patient settings.

Major Topics

- I. Renal/urinary elimination
 - a. Obstructive problems

The Common Course Outline (CCO) determines the essential nature of each course.
For more information, see your professor's syllabus.

- b. Benign prostatic hyperplasia
 - c. Acute renal failure
- II. Immunity
 - a. Autoimmune disorders
 - b. Immunosuppression
 - c. Organ transplant
- III. Perioperative care
 - a. Preoperative
 - b. Intraoperative
